

1st August 2003

Clearwater Pond and Lake Management have been treating our lakes for two seasons now at Pырford Golf Club.

Prior to their involvement the 23 acres of lakes were treated with Clarosan at huge expense. Since their involvement the costs are at 40% of the pesticides fee with the advantage of a 100% environmentally friendly service.

In the past the lakes suffered with Blanket weed problems. Under Clearwater's advisement the lakes have been planted with oxygenating plants before receiving their proprietary treatment three times a year.

The results have been excellent with no blanket weed problems and a very happy membership.

Clearwater offers a very professional service and are passionate about their field of work. I would have no hesitation in recommending their work.

A handwritten signature in black ink, appearing to read 'H Knowles', written over a large, stylized circular scribble.

Hugh Knowles
Senior Golf Course Superintendent
